Subject: NORTH SAN JOAQUIN WATER CONSERVATION DISTRICT - TRETHERWAY ROAD LODI

Hi, Joe,

Attached is the Customer Payment Coupon and Statement of Applicant's Contract Anticipated Costs (SACAC form) draft for the above referenced job.

Your payment options are either \$86,441.15 (10 year refundable discount option) or \$47,989.00 (fifty percent discount option).

These amounts include your PG&E allowance (credit) in the amount of \$19,000. This allowance would have to be used through the usage on the meter over the next 36 months beginning from the time PG&E installs the electric distribution facilities. If the \$19,000 allowance is not met, you will be deficiency billed after the three year period.

At your request I can either increase or decrease the amount of the allowance; however, to avoid the deficiency bill you will need to ensure the usage on the meter is at or more than the allowance granted.

Once I get your approval on the allowance granted, I will get the contract approved and emailed to you for payment.

Also attached you will find PG&E's construction drawing.

Please call with any questions.

Thank you.
